MEMORANDUM

Possible New SAM Site in the Haiphong Area

1. A review of 4 July TROJAN HORSE photography by a field installation indicates a surface-to-air missile site near Haiphong's Cat Bi Airfield. Obliquity precludes a definitive interpretation, but the site appears to be in an early stage of construction.

2. We have had earlier reports indicating that SAM sites were being constructed in the Haiphong area, and they have been expected there, but this is the first indication in photography of their presence.

3. We have asked NPIC for a more definitive analysis which is already underway.
